*My name is Junwei, I'm here because
I need the Illustration Certificate. I
love Japanese style anime so I wish
I can draw all those amazing CG for
games and anime.*

Final Project

nothing crazy

Not showing off...

WINGSTUN

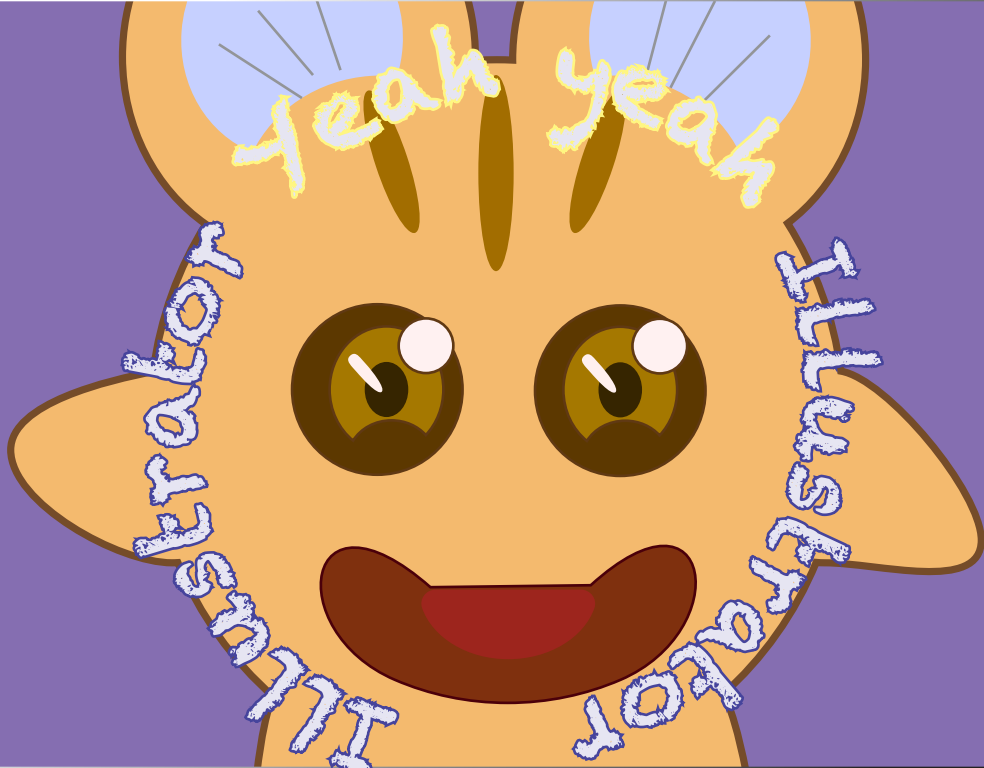

I think the effect are too strong....

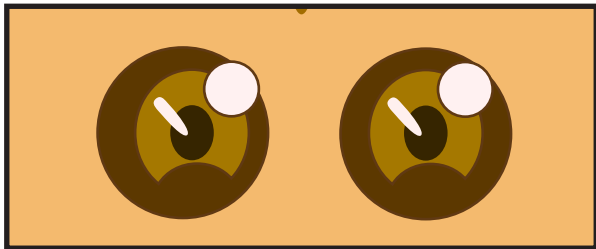

When I started doing the PS final project I forgot that I need a nice photo to work on, I just looked for a picture on my google drive and thats how it became. I really Like learning photoshop. It is a nice app for illustration too.

Final Project

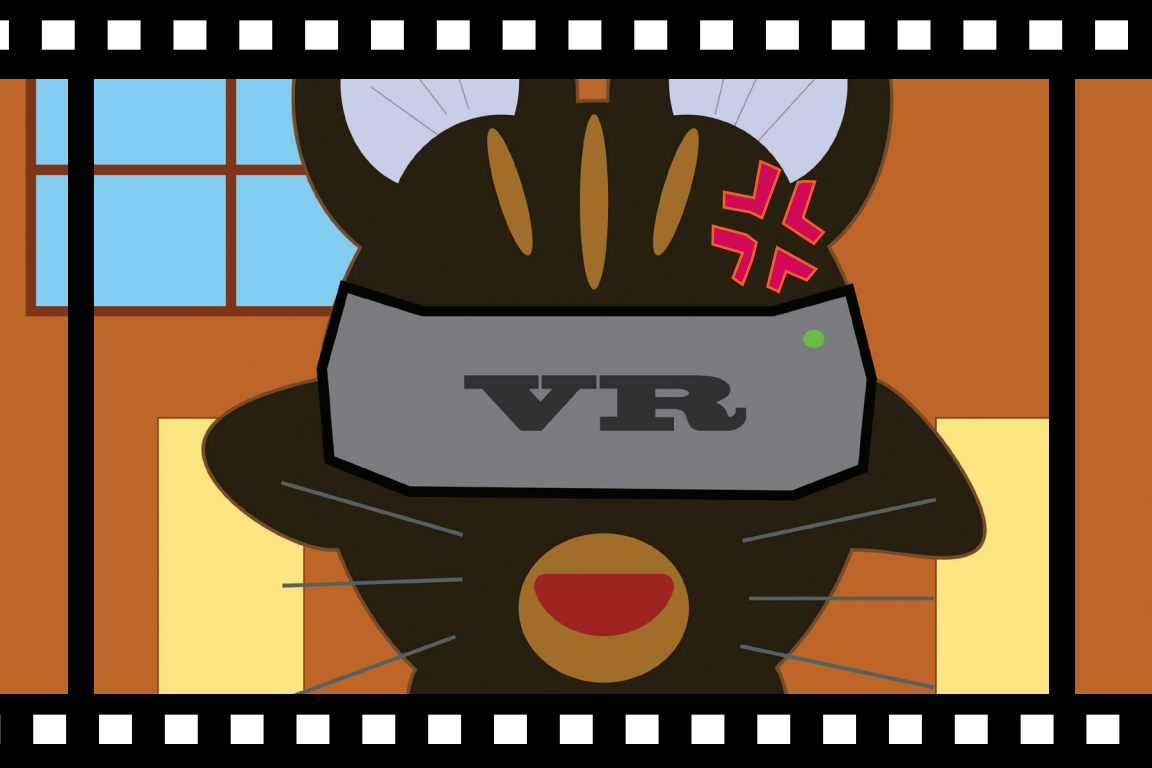

I tried to create something cute and funny In this project but It was so hard for me to choose the color for this creature! I kinda make it in ram-dom colors at the end. Illustrator was hard for me because I felt difficult to edit them.

Final Project

I had so much fun doing this project in adobe anime. I want to make something big but we have to make it simple. I like making anime after this, Maybe I will come back and get the anime Certificate as well so I can make and sell project on my own.
